FREEZE FRAME

Here it is at last...what you have been waiting for...the Freeze Frame Cartridge.

After months of extensive research we have produced what is the most versatile cartridge of its type, and have answered everyones prayers, by providing a simple to use way of transferring all those difficult programs to disc, making backups of fastloaders, and producing backup copies of all your protected discs.

Those of you who ordered Freeze Frame some time ago will now find the wait to have been worthwhile, and we apologise for keeping you all waiting for so long.

Past customers will know the quality of all our products, and the unavoidable delay with the Freeze Frame came about by constantly updating the final design to achieve the same standard.

By way of compensation, and as you will now need lots of disc storage space, we are offering all Freeze Frame customers, a Disc Nibbler at half price. The Disc Nibbler will cut an extra "notch" in the other side of all your discs, allowing you to use the reverse side, and giving twice the amount of storage space.

Normally £9.95, we offer the Disc Nibbler to Freeze Frame customers for only £5.00.

Please order in the normal way, and mention this offer.
